SKILLS

Languages

English – Excellent
Finnish – Native

Programming

C/C++
C#
Java
Python
Android
iOS

Graphics

Optimized 3D models
Texturing
Substance
Technical art

Game Development

Unity
Unreal Engine
Godot
Engine programming
Graphics programming
Shaders

Machine Learning

CNNs
Computer vision
Pose estimation
Gen. AI applications

Cloud Platforms

AWS
GCP
Azure
Scaleway

I am a skilled programmer and an efficient problem solver. I have been coding and making games from early childhood, learning everything from gameplay code and art to even writing my own custom game engines and 3D renderers. I have a deep and comprehensive technical understanding of games, enabling me to tackle complex problems with confidence and creativity.

EDUCATION

Bachelor of Engineering, ICT & Game Development

Metropolia University of Applied Sciences / 2016–2020

Upper Secondary School

Helsinki Upper Secondary School of Natural Sciences / 2013–2016

WORK EXPERIENCE

Chief Technology Officer

EvokAI Creative Labs / 2023–Present

As the CTO of EvokAI Creative Labs I have had the challenging role of leading the tech strategy of an innovative AI-powered med tech company and integrating the tech stacks of multiple acquired companies. I am leading the development of a comprehensive AI-powered platform for brain health and well-being.

Programmer, Artist, AI & Cloud Architect

Rehaboo / 2019–2023

I Joined Rehaboo as a game development trainee in 2019 and stayed as a full-time developer after my graduation. In addition to game programming and art, my focus was on AI and tech architecture. I designed a motion control system based on computer vision and cloud computing that made it possible to replace Kinect with a standard webcam. This allows Rehaboo's motion controlled exercise game to run on any device with a camera.
